

FINAL PROJECT

DATE: 08-09-25

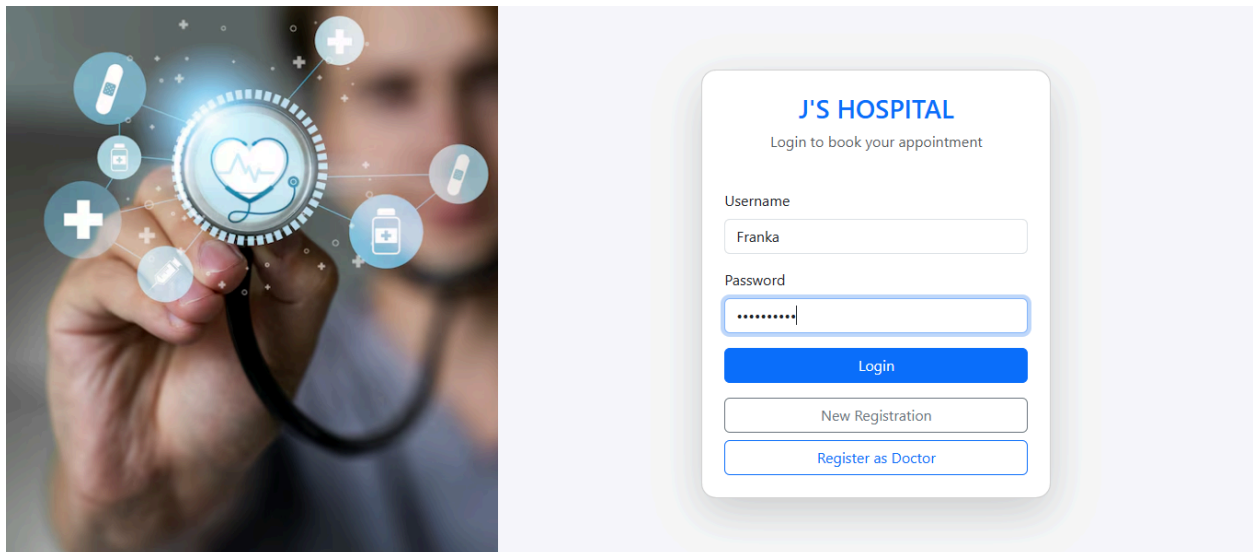

NAME: NANCY M

Appointment booking for the Doctor Project Abstract:

This case study focuses on the development of a appointment booking web application intended to provide a seamless interface for customers to browse, doctors from specific hospital and book appointments. The platform aims to enhance convenience for users by offering the opportunity to book appointments.

Patient flow:

Login Screen for Patient

Patient can see the all the doctors only they are approved by the admin and they also search as their need:

Filter Doctors
